EDMONTON, ALBERTA, WEDNESDAY, OCT. 8, 1952

Three Spend Night On Sand Bar

McMURRAY—The terrific wind-storm in McMurray and district Oct. 1, had its hazards. Mr. Mitchell, foreman for Boyle Bros., drilling down river, Mrs. Mitchell and Mr. E. Marlow of McMurray had their boat swamped and were forced to spend a hazardous night on a sand bar, the temperature dropping to 21. When they finally were able to reach shore and the Forestry office at McMurray the morning of Oct. 2, they were suffering from exposure, cold and ice on their clothing.

Mr. Bradford, pilot for Hudson Bay Fur trade spent two days in McMurray before going further north.

Mrs. E. Burke left on Friday's train to holiday outside.

High Winds Cause Minor Damage

LAC LA BICHE—A sixty-mile gale started to blow at 1:15 p.m. Thursday, which did some damage. Louis Richard had a chimney fire which was soon extinguished by the fire brigade. One side of the roundhouse blew in. Fred Weibel's car caught on fire; the roof of Mischuk's store blew off; Johnnie Mitchell's barn blew down, and the porch of a house down by the fish plant blew over the house. No one was reported hurt.

The mercury dropped to 23 above Friday at 7 a.m., the first freezing temperature of the fall in Lac la Biche.

McMurray Residence Burns To Ground

FORT McMURRAY — Flames swept the home of Mr. James Clarke on Oct. 1 during one of the worst wind storms in McMurray's history. Fire fighters were only successful in saving a small portion of the contents. Fortunately there was no one in the home which was razed to the ground.

The Anglican W.A. meeting at McMurray scheduled for Oct. 3, has been postponed until Oct. 10 at the home of Mrs. S. Rodgers.

Const. S. Craddock of McMurray and Waterways has returned from holidaying outside.

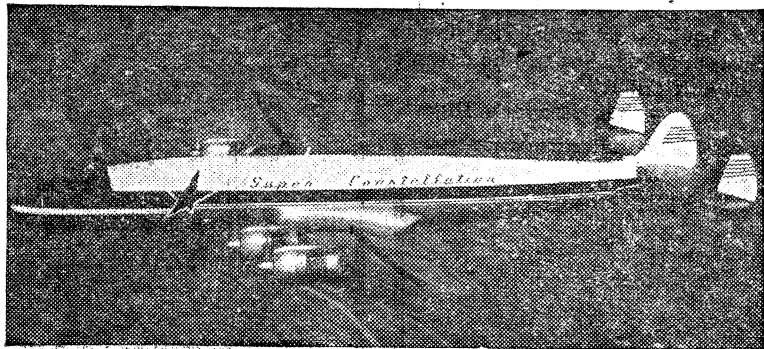

Calf Vaccination Proceeding; Farmer Co-operation Good

The Agricultural Service Board reports that the Bangs' vaccination of the heifer calves has been going well. Good co-operation has been received from the farmers—in a few cases it will be necessary to go back; these are cases where it was impossible at the time to get the calves in the barn. Some of the owners of the large range herds will have to be notified separately.

A couple of farmers have refused co-operation. It is not the intention of the Board to use harsh methods; at the same time, these farmers will be invited to a Service Board meeting, where the policy will be fully explained. If co-operation is still refused, prosecution will commence under the Livestock Diseases Act, Section 8. The penalty for refusing entry to the Veterinarian Inspector is \$50.00 fine and/or imprisonment.

The vaccination of the area north of the Athabasca River is finished. 160 heifers were vaccinated—347 calves have been vaccinated up to September 27.

The next will be north of Amber

Shown above is the new Super Constellation soon to be used on Airways to and from Canadian Airports. One of the world's largest and fastest commercial transports, the Super Constellation is 18 feet longer than the present Constellation, measuring 113 feet 7 inches in length, with a wing span of 123 feet. A cruising speed of 340 miles per hour will enable the aircraft to fly the distance between Montreal and London in 10½ hours. By employing exhaust gases to generate greater power through turbine installations, the four new Wright "compound" engines will deliver 3,250 h.p. each. The aircraft is structurally designed to use turbo-propeller power plants when this type of aero engine becomes available in suitable form for commercial air transport.

LOUIS RICHARDS DISPERSES HIS HERD OF DAIRY CATTLE

By HENRY THOMPSON

After nearly thirty years' experience handling dairy cattle, Mr. Louis Richards of Lac la Biche town, decides to quit milking cows. He is holding a public auction of all his high production milkers.

Mysterious Objects Photographed

LAC LA BICHE—Photographing the trail left by mysterious objects as they sped through the air over Lac La Biche was an outstanding experience for Mr. and Mrs. William Hrycoy of Egremont.

It occurred early one morning recently and the objects looked to both Mr. and Mrs. Hrycoy "like silver balls spinning through the air." Mr. Hrycoy ran for his camera and took a couple of pictures which show clearly the trail left by the "silver balls."

Church Notice

THE UNITED CHURCH
OF CANADA

Minister, D. A. Greenough

Sunday School—10 a.m.

Morning Worship—11 a.m.

Thanksgiving Service

Young People's Bible Class—

7:30 p.m.

Young People's Union—8 p.m.

Sale bills for this splendid herd are already posted and the sale will take place on Saturday, October 11, on the dairy premises just outside the town limits.

In an interview recently, he advised me that he was getting too old to handle the work required to keep the dairy up to top notch production. The family prefer other occupations, some have married and moved to other localities. The two youngest of the family still help him with the work but are attending high school, which means a pretty strenuous day's work for them.

Mr. Richards tried to interest some of our new Canadians, from countries where dairy work is a highly developed business, but the large development going on in Alberta and the high wages are too much of an inducement against the less spectacular work involved in taking care of a dairy herd and marketing its produce. Hired help at the present wage scales, in the low production months of September and October, makes good management of primary importance. Although they use two single unit milking machines, there is quite a bit of hand work necessary even then and that (in these push button times) is what does not appeal to average labor today.

He is not offering his dairy equipment at public auction, as he says this town needs a dairy and he thinks that some enterprising young couple will in due course grasp the opportunity to supply the needs of this fast growing town. Modern equipment at a reasonable cost, will go a long way to start a new man in a successful dairy business. Water works, electricity and the prospect of a gas fuel supply is bound to increase the population of Lac la Biche, all of which is good for business, and Mr. Richards is quite confident the town has a bright future, shaping up fast.

Stocks of grain in country elevators in Manitoba, Saskatchewan and Alberta on September 18 totalled 142.5 million bushels, almost double the volume of grain held a year ago (72.3 million).

Century Geophysical Field Crew Mapping Sub-Surface Features

LAC LA BICHE — Field operations with party number three for Century Geophysical Corporation of Canada out of Calgary commenced here about a month ago. There are numerous ways by which the presence of oil accumulation may be determined. Reflection survey by seismic means is one of the methods used. The Century crew now stationed in town is exploring area in question with seismic equipment.

Briefly, reflections are obtained from sub-surface horizons by creating an earth tremor by means of detonating a small charge of dynamite. This dynamite is placed at the bottom of holes. Explosion of the powder is caused by a fulminate of mercury cap which is disturbed from a spark of a blaster. The explosion forms a minute earth quake. The disturbance passes through the earth to a reflecting surface and then back to the top of the earth. Here the waves are picked up by geophones or "jugs". Each of these many jugs is connected to a long cable which feeds into a recording unit. This unit is usually mounted inside a covered van. Wave disturbance picked up by the geophones creates electrical energy, the pulsations of which are recorded on photographic paper. This long strip of paper is referred to as a seismogram or simply a "record". Records are treated, dried and cut into workable lengths. The office crew then affixes proper time values, applies complicated computations, obtains depth values and maps the results as interpretation guides.

Field seismic crews are immediately responsible to a Party Chief. The Century crew informs this paper that at present the duties of a party chief are exercised by a Party Manager, Mr. M. S. Stahl, and Seismologist, Mr. H. C. Diron. Mr. Dixon, graduate from UBC, is assisted by Mr. W. R. Adolphe, who is a graduate from the University of Saskatchewan.

Field seismic crews are immediately under the supervision of Operator Lloyd Eckroth, assisted by junior operator Jack McIlhagga. Survey information is compiled by Mr. Keith Rhvason and Mr. Derrick Jones. The shooter on the crew

is Mr. Bob Thrustan. Shot point drillers Messrs. Ted Fields, Gordon Rounds, Donald Stasso and Robert Ryan. Other members of the crew are Harley Reid and Jim Huppie.

It is noted, with interest, that this crew is staffed with all-Canadian personnel.

Due to the transferable nature of seismic work, most crews consist of single men, as is the case with party three with two exceptions. "Doodle-bugs", for so oil exploration people are called, are as a rule congenial and friendly. Mr. Adolphe tells us that he speaks for all members of the crew when he says that the citizens of this town and surrounding parts are among the most friendly they have encountered. The local office failed to disclose the length of their stay with us.

Lac La Biche Local News

A United Church Young People's Conference is being held at Alberta College Edmonton, over the Thanksgiving week-end. Registration is \$3.00. A full program has been planned with excellent leaders.

The Senior Trail Ranger Group held a party last Thursday evening. Plans were laid for future work this fall.

Mrs. Cadzow from Edmonton spent the past week with her son, Dr. Cadzow, and family.

Mrs. E. Cummings and son spent the week-end in Edmonton.

Mrs. Setzer went to the American border to report last week.

Mr. F. McMillan purchased the residence of Mrs. Sanderson.

Mr. H. Albert was in the city last week.

Fishing season closed for commercial fishing in all lakes on September 30.

The road to Big Island is under construction.

Filmed in brilliant color, and depicting the daring exploits of a fabulous English sea captain. The cast is headed by Gregory Peck, Virginia Mayo and Harold Beaver. Friday at 8:30, Saturday at 2:30, 7:00 and 9:15.

Mon. and Tues., Oct. 13 - 14—
Big Double Feature Program!
"BARBED WIRE"

Is Gene Autry's newest rootin', tootin', shootin' adventure.

"LITTLE EGYPT"

Takes you to the Chicago World's Fair and a transplanted street of old Cairo.

At 8:30 p.m.

Farm Help Takes Food, Belongings

OPAL — A man claiming to be a brother of Johnny Bourassa well known bush pilot, disappeared from the farm of George MacDonald with some food and personal belongings.

Being acquainted with George, he came to ask him for a stooking job, and after spending a day or so on the farm he disappeared while George was away from home.

Boy Shot Through Leg

TOMAHAWK — Clyde Yager was accidentally shot through the leg on Wednesday, September 26. His brother Lyle was working on the gun, which discharged as Clyde walked by. The bullet entered his leg above the knee, coming out the other side just below the knee. The boy was rushed to hospital. Both boys are public school students.

"Gardenettes" Hold Show

CORONADO — The "Gardenettes" had a show on September 16 in the United Church. The

show was held on behalf of the Alberta Wheat Pool. Miss R. Whaley, who was present, talked to the girls about their gardens. Mr. Stewart directed the films. The Gardenettes plan another meeting later on.

Puppy No Match For Car

KEEPHILLS — Mr. Basil Radcliffe's little five-month-old dog was no match for the car he met on the road last week, and it was found dead next morning.

Imagine That!

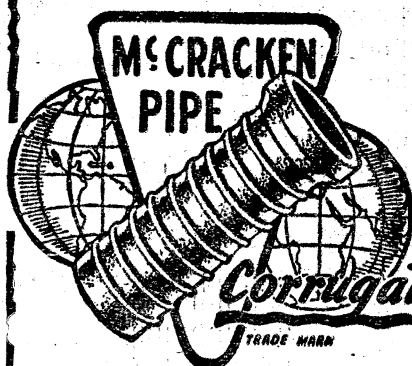

A city youth spending his vacation working on a farm was discovered one morning stuffing a small, squealing pig into a bucket and muttering, "It's a miracle!" What are you trying to do?" demanded the farmer. "And what's a miracle?"

"I can't figure it out," said the city fellow. "This pig just drank two buckets of milk, and I put him into the bucket and he doesn't even half fill it!"

—The Reader's Digest.

Ontario's production of oats 1,000 bushels, down 14,615,000 and barley is estimated at 74,942, bushels from last year.

Friday only at 7:00 and 9:15 p.m.	

FARMING TOPS OIL AS ALBERTA INDUSTRY

Alberta's tremendous oil development has attracted world-wide attention, but this week Albertans took a long, hard look at their province to realize agriculture is still their leading industry. A report from the provincial government on resources and industry disclosed that agriculture holds a thumping six-fold lead over the oil business.

Last year farmers chalked up a record-shattering \$767,323,000 in farm production—up almost \$200 million from the previous year. Compared to this, the oil industry's production valued at \$116 million, was a mere one-sixth as great.

Petroleum ranked third as a producer of wealth in Alberta last year, with mineral production in second place. But even mineral production of \$173,230,000 was a long way behind agriculture.

In fact, it is estimated wheat production alone will net Alberta farmers \$225 million, by the time the 1951 crop is fully accounted for.

In line with these dollar totals were the size of the payrolls carried by the three leading industries.

There are 84,315 farms in Alberta, giving a direct livelihood to about 330,000 people—or more than one-third of the province's entire population.

In comparison, there are only about 8,000 working in the mining industry, and about 6,000 engaged in the petroleum and natural gas industries. The oil industry provides a payroll of just under \$27 million annually.

Other interesting facts and figures on booming Alberta show:

1. Wholesale trade last year valued at \$480 million.
2. Retail trade over \$831 million.
3. Bank clearings nearly \$3 billion.
4. Building permits \$142 million.

Along with the report from the provincial government underlining the importance of agriculture, came figures from the Dominion Bureau of Statistics on the ninth census of Canadian farm animals.

The census generally showed that Alberta is second only to Ontario as a farming province. Alberta has the second highest number of horses, sheep and goats

of any province, and the third highest in swine and cattle. The province was fourth with the number of poultry.

The significance behind these

facts and figures is to point up the versatility of Alberta. Probably no other province offers so many opportunities as does Alberta, be it on the farm, in the cities, on in the oil fields.

Only Borrowed Calves —Gets New Trial

EDMONTON—A suspected cattle rustler won a new trial after he claimed he borrowed two calves to practice cattle roping for a rodeo.

Lewis Fisher, aged 18, won the new trial in the appellate division of the Alberta Supreme Court after

his defence counsel claimed he had not "a fair deal."

Fisher pleaded guilty to the cattle theft charge on July 29 and was sentenced to two years less one day in jail. However, the accused claimed he had not intended to keep the two calves he rustled as he only wanted to practice roping them for the Stony Plain Stampede.

The Editor will pay \$1.00 for every item published on "The Most Embarrassing Moment of My Life." To qualify, items must be true, personal incidents. Address "Embarrassing Moments", P.O. Box 4368, South Edmonton.

One morning as I was getting off my bike at school my pants got caught in the works of my bicycle seat, and did not know that at the same time I ripped a big hole in them, But soon found out when I saw all the fellows and girls making a joke over me. I was embarrassed, not only for one moment, but for the rest of the day.
PETER KURLUK.
Mannville, Alta.

The Bare Facts

In Mays Landing, N.J., Dr. Isley Boone, ex-president of the American Sunbathing Association, termed nudism the only way to world peace, because "it would be difficult to tell which man was your enemy if soldiers wore no clothes."

The Importance of Soil Conservation

Because of mechanization the exploitation of the soil in North America is possibly the worst in the history of mankind. Already in the comparatively short history of the United States 50 million acres of choice farm lands have been ruined, 100 million acres have lost 75% of the top soil and a further 100 million acres have lost 25% of the productive layer.

Four billion acres of arable land, at the present time, feeds the world's population of 2 1/4 billion human beings. The population of the world is increasing rapidly, while at the same time the soil resources are being destroyed through erosion.

Soil Not Thoroughly Understood. Possibly the biggest stumbling block in soil conservation is the fact that many people think of soil as simply a mixture of minerals and organic matter, which must be cultivated in order to produce a crop, and which tracks up the kitchen in wet weather. Soil is indeed a mixture of minerals and organic matter but it is also a living mass of tiny organisms. The work of these organisms is to change the raw minerals and organic matter of the soil into plant food. Without them no crops could be grown, and without organic matter the soil organisms have nothing on which to live. Organic matter is important in other respects also. It enables the soil to absorb moisture, and to retain it. It holds the soil together. Without organic matter and fibre the soil has no binding material. It is then at the mercy of every wind that blows over it and every rain that falls upon it.

Bare Fallow Destructive. Most of our erosion takes place on bare fallows. Nature always supplies a protective cover. We could protect our fields if the trash and stubble remaining after cropping was utilized to the best advantage. Burning, careless cultivation, or the wrong choice of implement can destroy that protection. We need a change in our attitude toward the soil. We must all work for conservation. Yes, you too have a responsibility to the soils of Western Canada.

Another Savings Issue

The fact that there is soon to be placed before the public the 7th issue of Canada Savings Bond Series is most encouraging, a proof of their soundness, and an incentive for citizens to take part in the Dominion's financial move, while at the same time receiving a substantial rate of interest on their investment.

We recently overheard a lady say that she wouldn't buy any Bonds in case the Government failed. How foolish, and yet there are still people who do not trust banks or government. If they could only realize that nothing can possibly be safer than Government bonds, especially those of our own Dominion. Canada is backed by so many resources, rich in farming, forestry and fishing, with an ever-growing development in Mines and Minerals, comprising production of iron ore, titanium, coal, copper, gold, lead, magnesium, and silver, to mention only a part.

There surely should be no doubt whatever as to security, for where can you find another country as rich or sound as our Dominion?

With an average yield of 3.44% if held to maturity, this issue will be obtainable from Banks, Investment Dealers, and Trust or Loan Companies. Your order can be placed with your employer if you so wish, when regular deductions to cover it will be made from your salary over a period of 12 months. This we feel is an easy and encouraging way for the average person to save on a real sound investment. Furthermore should the occasion arise when you are pressed for ready money, these bonds are immediately redeemable.

The lot of our people has been prosperous and happy, and we would urge all good citizens to do their utmost in furthering Canada's progressive future as well as their own interests, by investing themselves, and encouraging others to do likewise.

Winners Announced

Thirty-five scholarships, totalling \$16,000 have been awarded to Alberta graduates of the 1951-52 Grade XII classes in Alberta High Schools. This was announced by A. G. Swinerton, Fort MacLeod, president of the Alberta Hotelmen's Association, sponsors of the scholarship plan.

This program is particularly commendable because it is awarded on the basis of a combination of scholastic attainment and financial need. It gives a welcome "assist" to young men and women who have the ability to learn University subjects but who might otherwise be unable to afford to go to college.

There are five Calgary winners, five Edmonton winners and 25 students from outside the province's two major cities who benefit this year by this program. We hope the hotelmen will be encouraged by the knowledge that the results this year will start promising young men and women on a university course which they might not otherwise have.

The association has set an example that other industries might well take as their cue for doing something similar in the field of public service.

Scaring Ducks

"Keeping Ducks on the Wing" is the name of a pamphlet just prepared by the provincial department of agriculture, which offers some worth-while suggestions as to how crops may be protected from the wild ducks which are present in exceptionally large number this year. Farmers in areas where ducks are already causing damage or where damage appears likely should read this pamphlet, copies of which are available from the offices of the district agriculturists.

The Bible Today

For it is better, if the will of God be so, that ye suffer for well doing, than for evil doing. — I Peter, III, 17.

Power Take-Offs Are Dangerous

The power take-off on the farm tractor is a dangerous attachment, which should only be used with the greatest care. The careful operator will make sure that it is properly shielded at all times. Within the past few weeks there have been two tragic accidents in Alberta involving power take-offs.

A Cardston district farmer was burned to death after becoming trapped in the take-off of a hay baler. While making an adjustment his arms apparently became entangled and for some reason the machine caught fire. He was dead when found.

In the Vulcan district another farmer received fractures to an arm and a leg as well as other serious injuries. He was drawn into his swather when he leaned over the unshielded power take-off. His hired man and a neighbor, who happened to be passing by on a nearby road at the moment, saved him from even greater injury.

Painless Childbirth Danger To Newborn

60 per cent of deaths among newborn babies are caused by oxygen starvation, and this oxygen starvation is largely due to anesthetics administered to mothers in labor, says medical writer J. D. Radcliff in the September Reader's Digest.

"Everything indicates that babies on the point of being born are more susceptible to anesthetics and pain-killing drugs than is the mother," Mr. Radcliff reports. "Often a mother is given only enough drugs to dull the sharper bites of pain, yet her baby is born blue and apparently lifeless." When no anesthetics are administered, almost all babies are born wide awake and able to take the first crucial breath without help.

Experiments on animals suggest that our methods of killing the pain of childbirth may be responsible for some of our mental defectives, epileptics and cerebral palsy victims. Guinea pigs and rats surviving oxygen starvation at birth are less able to thread their way through mazes as adults than are litter mates born normally. While this doesn't mean that anesthetics will always injure the baby, Radcliff warns that it does call for greater wisdom and caution in obstetrical anesthesia.

At present, our infant-mortality rate of 11 out of every 1,000 live births is shockingly high, according to all authorities. Mr. Radcliff believes it can be reduced if mothers will look upon labor as work rather than pain and demand less sedation. Natural childbirth, for which women train during pregnancy, is a step forward. Many deaths could also be avoided if all hospitals had proper infant resuscitators for helping newborn babies to breathe.

Qualities Of Love

And I will show you a still more excellent way. If I speak in the tongues of men and of angels, but have not love, I am a noisy gong and a clanging cymbal. And if I have prophetic powers, and understand all mysteries and all knowledge, and if I have all faith, so as to remove mountains, but have not love, I am nothing. If I give away all I have, and I deliver my body to be burned, but have not love, I gain nothing.

Love is patient and kind; love is not jealous or boastful; it is not arrogant or rude. Love does not insist on its own way; it is not irritable or resentful; it does not rejoice at wrong, but rejoices in the right. Love bears all things, believes all things, hopes all things, endures all things.

Love never ends; as for prophecy, it will pass away; as for tongues, they will cease; as for knowledge, it will pass away. So faith, hope, love abide, these three; but the greatest of these is love.

—From the First Letter of Paul to the Corinthians.

Note and Comment

In Alberta this year 16,700 acres are planted to potatoes, a reduction of 1,000 acres from last year.

NOTHING BUT THE TRUTH by Russ Arnold

Voice of the People

"RED" POLAND

A recent issue of Time Magazine made reference to Kurt Schumacher, "The only son of a Prussian civil servant in the fortress town of Kulm (now part of Red Poland)."...

Calling it "Red" Poland smacks as an insult to a nation which has consistently resisted Russian oppression and Communism. Poland is behind the iron curtain today because a U.S. President made a secret deal with the Communists. No Pole was present at Yalta when it was decided to give Poland a Communist Government. The Polish Government never recognized this clique.

I was attached to the U.S. Military Governor in Bavaria in 1945. Military authorities and United Nations Relief and Rehabilitation officers urged us to return to Poland and build a Democratic Government. At that time the Communist clique was called Democratic. Now Time calls Poland "Red".

Americans should remember that they—not the Poles—arranged for Poland to be dominated by the Russians. No wonder Europeans aren't friendly to America, in spite of the generous material gifts sent since the end of World War II.

MARIAN KRZYZANIAK.
Sanguo, Alta.

PROBLEM PARENTS

We hear a lot today about our teen-age problem. I don't think we have such a problem, but we certainly have a parent problem. The family altar is a thing of the past, family co-operation is forgotten. Do we treat our chil-

dren as individuals, take time out to explain problems to them?

Just recently I visited a home where a little girl, I judge about nine, asked her mother for some help with spelling. The child was told to run along and not bother the mother, who was talking to a group of ladies. The little girl then went to her Daddy, and he said: "What do you go to school for? You are so dumb, why don't you remember what you are taught?" At this point the child began to cry, and pleaded for some help, but she didn't get it.

Perhaps this is an exception, at least I hope so. Our Home and School Associations would be doing a wonderful work if they could start a Parent Education Program.

D. C. P.

TRUE TO BOTH COUNTRIES

Canadians who refer to Englishmen as "limeys" just don't know England or they wouldn't talk that way. I've been living in Canada since the war ended, and like it, but they'd have to throw me out before I'd give up my English heritage. "There'll adways be an England".

ENGLISH GAL.

"PROSPERITY"—WHY?

Don't give the Liberals or Social Crediters credit for the prosperity of the last 15 years. It belongs to Hitler and Stalin. The phony prosperity created by World War II helped the Liberals until 1946. Then, when a depression threatened the Korean War came along just in time. Why don't the politicians give credit where it's due?

HONEST JOE.

COUNTRY AUTUMN

To walk alone in the autumn wood
Is to walk alone with the richest mood
Of sorrow.

To watch the poplars sigh and sway
Tears the soul with the joy of yesterday
And the dread of tomorrow.

The geese honking high in their southern flight
Seem to carry with them the last visage of light
From field and hill.

With Summer and Youth, a man needn't part
If he had but wings—O Gypsy heart,
Be still!

GEORGE RYGA.

NURSING SISTER L. M. McDONALD

MAKES 24 JUMPS IN ONE YEAR, N.S. McDONALD SETS RECORD

By FLORENCE E. FORSYTHE

Nursing Sister L. M. McDonald of Vancouver, who is presently stationed in Edmonton and who is a member of the para-rescue team, has made more jumps than any other woman in Canada. From Labor Day, 1951, at which time she made her first jump, until Labor Day, 1952, Nursing Sister McDonald made 24 jumps!

During World War II Miss McDonald, as a member of the WD's, did radar work. She was in the services from 1943 to 1945, and upon release used her DVA credits to train as a nurse, which training she took in Vancouver. Following her graduation, she nursed for a year in Vancouver General and then went to Berkeley, California, where she nursed for four months. It was while Miss McDonald was at Berkeley that she heard the call of the "silk" and returned to Vancouver, where she joined the para-rescue squad of the RCAF. She was transferred to Rockcliffe, Ontario, where she received her training.

Para-rescue training takes from four to five months and ten jumps are made during that time. Six jumps are made into an open field and four into timber. Jumps are made from 1200-1500 ft. up. Besides learning to jump, members are taught mountain climbing, how to negotiate ice, and they become skilled at living off the land in summer or winter.

For instance, our heroine tramped through 12 miles of bush land with a pack which weighed 65 lbs., and the temperature was a cool 45 degrees below zero—and she is here to tell about it! For all her strenuous activities and training, Miss McDonald has only suffered one accident—that was while she was skiing! She broke her leg in April and in June was jumping again.

When asked what reaction one felt when making their first jump, Miss McDonald said it was im-

What's in the Name

BRUCE

The hamlet of Bruce, some 24 miles from Vegreville, was named after A. Bruce Smith, manager of the GTP Telegraph Co. The hamlet was previously known as Hurry P.O., and was changed to Bruce in 1909.

KITSCOTY

A village, Kitscoty was named after an old Druid structure, called "Kits-Koy", situated near Maidstone, Kent, England.

Kitscoty has a population of 235, and is situated in a farming region some 150 miles east of Edmonton.

excitement in anticipation of the jump is greater than the fear."

At the moment Miss McDonald is instructing first aid at the Survival Training School at the Edmonton RCAF Base. Included in her work is teaching students how to survive an outdoor life under any and all circumstances. The day this young lady was interviewed, she had just returned from a Survival camp, 160 miles west of Edmonton, where they had been setting up an emergency hospital.

Nursing Sister McDonald is of the opinion that para-rescue training will play a major part in peace as well as in war. She thinks that in the not too distant future, aircraft will be used to take help to an accident victim who may be within even a few miles of a city. While automobile is fast, she points out, aircraft is even faster. There are many outlying districts where roads, especially in wet weather, are almost inaccessible. It is to such places that Nursing Sister McDonald feels the para-rescue squad will eventually find their way.

"They look such a happily married couple, John."
"You can't go by looks, dear. They probably say the same about us."

\$1 for Favorite RECIPE

PEANUT BUTTER COOKIES

1 cup butter (or margarine)
1 cup white and brown sugar
1 cup peanut butter
3 cups flour
2 tsp. soda
1 tsp. salt
1 tsp. vanilla.

Cream butter, add sugar, eggs well beaten, peanut butter and then sifted flour, soda and salt. Mix, roll in small balls. Press with fork. Bake at 400 degrees.

Miss Violet Babrownik, Tomahawk, received \$1.00 cheque for her favorite recipe. If you have a Favorite Recipe send it to the Recipe Editor, P.O. Box 4368, South Edmonton.

Perhaps There's a Bounty

Somewhere in Scotland a rector of a country parish was hunting up isolated church people.

Calling at one cottage, he asked the woman who came to the door if there were any Episcopalians in her neighborhood.

"Well, sir, I don't rightly know, but my husband shot some strange creature the other night, and its skin is on the barn door; you might take a look at it."

LETTERS TO LOUISA

Dear Louisa:

I need advice before I go insane. I have been married to my husband fourteen years and have four children. We have a nice home, car and everything else the average family has. I am nice looking and a hard worker in the home. I have always stayed at home and done without lots of things but now I see where I was wrong.

My husband started going out and drinking a lot and from that he got in with the wrong crowd and now he's told me has been going with a married woman with children but if I would forgive him he would forget her as he still loves me. But how can I ever forget and trust him anymore. I love my husband too much to give him up.

Please print my letter as I want him to read it.

SARAH.

Answer:

I can understand how you feel about this situation but you will have to do what is best for both you and your children. Would you be happier away from your husband or with him? After all he has confessed his fault and asked your forgiveness. But no matter how upright and straight he is from now on you will always wonder if he is or not. He has lost as much as you have because it is wonderful to have a wife who absolutely trusts and loves you and thinks you can do no wrong. When faith in a person is destroyed, it is very hard to regain it.

But he loves you and you love him so my advice is to start all over again and while you won't be

able to forget what he has done for a long time, you can refuse to throw it up to him. Be more of a companion to him and go with him when he wants to play. Wives make a big mistake letting their husbands find their fun alone while they stay home to save money. They usually lose more than they save.

LOUISA.

Beautiful Baby

This busy little fellow is Wayne, the one-year-old son of Mr. and Mrs. Osbak of Burtonville, and the great-grandson of the late Wm. H. Walker, also of Burtonville.

New License Series Available For Cars

EDMONTON — Because of a flood of license plate applications, the Alberta Government recently announced it has decided to issue two series of license plates it had previously not intended to use.

Plates with "I" and "O" letters will be distributed. The letters were not distributed before because of their similarity to the figure one and the zero figure. Licenses issued so far total more than a record 170,000. With the two new series, 200,000 plates will have been made available for the 1952-53 license year.

\$1 for BRIGHT SAYINGS

The Editor will pay \$1.00 for each child's saying printed. To qualify, items must be true, personal remarks of a child known to the writer. Address "Bright Sayings", P.O. Box 4368, South Edmonton.

What with all the newscasts and papers, telling of our Cold War with Russia and the claim of Russia discovering this and that in our world and collecting same, our seven-year-old decided it must be true, in part at least.

She was frantically turning the dial on the radio to try to find her favorite program, but the radio wasn't giving out just then, so tearfully she turned to her Dad and said:

"Those mean old Russians have just been out and gathered up all the air waves and I can't get anything on this radio."

Gainford, MRS. R. RYLEY.

The first time the new Diesel train passed through from Calgary to Edmonton, my little boy ran in and asked what that was, and I said it was the Diesel. The next day, I was drying dishes when the door burst open and he ran in shouting, "here's a weasel, here's a weasel!" And I almost dropped the dish I was drying, as I turned around, expecting him to be holding up a dead weasel! But he just stood there with the look of joy all boys have when it comes to trains, and said, "hear it whistle." I'm going to get one for Christmas!

Lewicki Injured When Tractor Starts

GRASSLAND—Mr. Harry Lewicki of the Willow Flat district sustained painful injuries Sunday afternoon while cranking a tractor. The tractor had been left in gear, and when it started it pinned Mr. Lewicki against a granary. The crank penetrated his stomach, and, on being rushed to Athabasca hospital, an emergency operation was immediately performed by Dr. Wright. Mr. Lewicki's condition is now reported as satisfactory.

Mr. and Mrs. Nick Derko returned from their trip to Ontario Saturday, in a new International truck, which Mr. Derko intends to put on the gravel haul. They report an interesting trip, and Mrs. Derko was quite entranced with the beautiful scenery in the East. Thursday's wind storm put a temporary end to threshing operations in the district. A large building used as a garage by Mr. Walter Holdis was blown over, and several granaries and out-houses suffered damage. Telephone communications were also disrupted. Miss Olga Dutchak has returned from hospital at Lac La Biche, after undergoing an operation for appendicitis.

Mr. and Mrs. Nick Fedorchuk are happy in the arrival of a seven and a half pound baby boy on Sept. 25. Mrs. Fedorchuk is a former teacher at Grassland, while Nick used to work for N. Derko.

Mrs. Dakin took pupils of grades 7, 8 and 9 to see the picture "Kim" at Boyle. The film "When Worlds Collide" had to be substituted for the advertised attraction, but everyone seemed satisfied.

Birthday party for Mrs. Duniec was held on Friday.

Recent visitors in Grassland were Mr. Lionel Hurtubise, and Mr. Maurice White and family.

Mrs. Esdras Belanger of Plamondon, has been visiting her daughter, Mrs. Dale Mellott at Grassland.

Mr. Joseph Stepaniuk has purchased a new 1-Ton truck, which he expects to be very useful in his farming operations.

Freedom News Briefs

Rev. Brown, pastor of St. Mary's Anglican Church in Barrhead, arrived home after visiting his folks in Ireland for two months.

The latest polio victims in surrounding districts are Garth Roberts of Manola and Don Lazzer of Woodmore.

Mr. Dick Meyer is the proud owner of a new half-ton Chev. truck.

Wilmer Carlson is now employ-

ed by the road gang working near Freedom Store.

Erna Lehman took one week off from work to help her folks with harvest.

Mr. Ken Chilleen has left for his home in Deerwood, Minn.

Mrs. Louise Anderson has gone back to Grand Rapids, Mich., where she is employed.

You might try going to church next Sunday; you can't blame the heat much longer.

Stitches Required To Close Gash

BON- ACCORD—Chester McBride, youngest son of Mr. and Mrs. Gordon McBride, had the misfortune to fall and cut one of his knees badly, while playing with his pals. He was taken to Dr. Perreault at Morinville, where three stitches were required to close the gash. Consequently, Chester is hobbling about with the aid of a cane.

\$93,494,460⁵⁷

Since the first Canada Savings Bond was sold—interest payments totalling about ninety three and a half million dollars have been paid out to about one million owners. This represents an average return of approximately \$100. Some owners have earned more interest than this—some less—but all would agree that they have had a handsome return for an investment that is cashable at full face value at an instant's notice.

It is the easiest, most carefree way to earn money that one can imagine. And now the new Seventh Series of Canada Savings Bonds offer a better return than ever! They pay an average of 3.44% per year if held for their full term of 10 years and 9 months. The Seventh Series bonds—like earlier issues—are cashable at full face value plus interest at any time at any bank in Canada.

Scriptural Meditations

By Ainsley Blair

"It is not the greatness of the act of disobedience that constitutes sin, but the fact of variance from God's expressed will in the least particular; for this shows that there is yet communion between the soul and sin. The heart is divided in its services. There is a virtual denial of God, a rebellion against the laws of His government."

"Were men free to depart from the Lord's requirements and to set up a standard of duty for themselves, there would be a variety of standards to suit different minds, and the government would be taken out of the Lord's hands. The will of man would be made supreme, and the high and holy will of God—His purpose of love toward His creatures—would be dishonored, disrespected."

"Thoughts from the Mount of Blessing."

Duck Hunter Dies From Shot

GAINFORD — On Saturday, Sept. 20th, while duck hunting on Lake Isle, just north of Gainford, Darrell Massie of Edmonton was fatally shot.

Massie and his companion, Skakum, had both shot at the ducks, then apparently Massie told Skakum to shoot again and as Skakum aimed and shot, Massie jumped up into the shot range.

Part of his head was blown off and he died almost instantly. Massie is the grandson of Mr. and Mrs. John Jones.

Quebec Couple Visiting Here

EON ACCORD — Visitors from Quebec are LAC. Norman G. Frost and Mrs. Frost (nee Mary Lewis). They are staying with Mary's father and mother, Mr. and Mrs. Charlie Lewis. They travelled by motorcycle from the RCAF station at Bagotville, Quebec. The trip took nine days,

including visits with friends and relatives en route.

They hope to remain in the district until the middle of October. During this time the Frosts will be "on the go" visiting with their many friends.

Alberta's spring pig crop is estimated at 1,138,500. Of this total 20.2 per cent died, leaving only 908,000 saved.

FIRE PREVENTION WEEK

OCTOBER 5th - 11th

Is Required Of Us. ONE and ALL

FIRE PREVENTION does not happen. It is caused by the efforts of thoughtful men and women. Find out what you need to know about fire safety; this is a week proclaimed for that purpose. WORK IN CO-OPERATION with your Fire Department. The fire inspection service of modern fire departments, is developing to keep pace with modern machinery for fighting fire and more extensive training for firemen. Fire waste hinders progress. Death and destruction from fire can be prevented by remedy of fire hazards and by knowing what to do in case of fire.

"HELP REDUCE ALBERTA'S FIRE WASTE"

Hon C. E. Gerhart,
Provincial Secretary

A. E. Bridges,
Fire Commissioner

Have you tried the Free OLIVER WORK-TEST?

Don't miss it! See Oliver machines at work—work them yourself!

Before you buy any new machine accept our invitation to try an Oliver in

your own fields first, under your working conditions. There's no obligation, of course.

Climb into the comfortable rubber spring seat of an Oliver tractor. You'll like the way it handles, the way it pulls, the convenience of its Direct Drive Power Take-Off.

Plow a few furrows with an Oliver tractor gang—make a round or two with an Oliver baler combine, corn picker, or whatever tool is seasonable. It won't take you long to see for yourself how it saves!

That's the only way to appreciate the work-capacity, the downright efficiency of Oliver equipment, the advantages of its exclusive features.

Stop in at your earliest convenience. Name the machine you'd like to work-test—and we'll get it to you.

HOSPITALIZED FOR YEAR, MRS. J. ST. JEAN PASSES

PLAMONDON — The recent death of Mrs. Josephine St. Jean of Plamondon was felt by all her friends. After suffering in hospital for almost a year, Mrs. St. Jean passed away in an Edmonton hospital on Sept. 21.

Mrs. St. Jean, better known to all as Aunt Josie, was a daughter of the late Mr. and Mrs. Joseph La Bonti, born in Lake Lelaneau, Michigan, U.S.A., on December 1st, 1890, and was married on December 2nd, 1917, to Edmund St. Jean of Montreal.

In 1945 she took very sick in Montreal and at that time her brother, Richard, and sister, Mrs. Wm. Dumas, visited her there. . . . After that, due to failing health, Mrs. St. Jean returned to her home town here and remained up to the time of entering hospital in November, 1951.

Mrs. St. Jean was a member of the Ladies of St. Anne here, always a willing worker for any church and social affairs and even knowing her health was failing was always cheerful and kind to everyone.

Funeral services were held from St. Isadore's Parish Church, Rev. Fr. Ricard officiating, and she was laid to rest beside her parents in the Plamondon cemetery.

She leaves to mourn her loss, Mr. Richard La Bonti, Germain La Bonti, Emanuel La Bonti, Mrs. Charles Johnson, Mrs. Wm. Dumas and Mrs. Prosper Lemoge of Edmonton.

Margarine production during the first eight months of this year totalled 67 1/4 million pounds, compared with nearly 69 million in the same last year.

Wandering River News Notes

Frains News Briefs

Fred Ustina came home last week-end, with his fiancée, to be introduced to the family circle.

Mr. Steve Kuzik is the proud owner of a Waterloo threshing machine.

Tony Sawchuk, who had his foot amputated this spring, is starting to walk on his new foot just

recently set. He is hauling grain at present. Mr. and Mrs. Sawchuk are very grateful to all the donors who helped them out. Fred Ustina donated \$20 and Mrs. D. Nahorney donated \$2.

Children's faces were all smiles when Mrs. Emily Sawchuk rang the school bell, for the Senior room last Monday.

Threshing is in full swing. Miss Olga Loposhensky is helping Mrs. Ustina cook for threshers.
